

Hostel Maintenance & Issue Ticketing System

Actors

Actor	Description
Hostel Resident	Student/resident who logs maintenance issues and tracks their status
Maintenance Warden	Staff member responsible for reviewing, assigning, and resolving tickets
Hostel Administrator	Oversees ticket closure, sign-offs, and escalations for overdue issues

Use Cases

Use Case	Description
Log Maintenance Ticket	Resident raises a new issue (e.g. broken fan, leaking tap)
Attach Photo Evidence	Optional add-on to a logged ticket — resident attaches a photo of the issue
View Ticket History	Warden views past/current tickets for reference
Assign Ticket to Staff	Warden assigns a reported ticket to maintenance staff

Validate Ticket Details	Mandatory check while assigning — confirms ticket info is accurate/complete
Track SLA Timeline	Warden monitors how long a ticket has been open against the SLA deadline
Update Ticket Status	Warden updates progress (e.g. In Progress, Resolved)
Close Ticket / Resident Sign-off	Mandatory step to close — resident confirms the issue is resolved
Escalate Overdue Ticket	Administrator escalates a ticket if it breaches SLA — triggers extra scrutiny on the SLA timeline
